

SECTION 2

PERFORMANCE STANDARD REVISIONS

2. PERFORMANCE STANDARD REVISIONS

Background

The Santa Clara Valley Urban Runoff Pollution Prevention Program (Program) developed model Performance Standards (PSs) in 1996. The model PSs were accepted by the Water Board in June 1997. Each Co-permittee adopted the model PSs or tailored them to their local community characteristics and conditions. The original PSs were incorporated into the Program's 1997 *Urban Runoff Management Plan* (URMP)¹. Revised PSs are included in the 2004 Program URMP and the Co-permittees' local URMPs, in accordance with NPDES permit Provision C.2.b

Future Efforts- FY 07-08 Activities

Priorities for recent efforts to revise or create new performance standards have been driven by the requirements in the Program's NPDES permit and/or continuous improvement tasks. All new or revised PSs required by the current permit have been completed. Future decisions to revise or update existing PSs will be based on the requirements of the Municipal Regional Permit, expected to be adopted sometime during FY 07-08.

¹ In accordance with Permit Provision C.2.b., the Program submitted the 2004 URMP (dated September 1, 2004) to the Water Board on September 1, 2004. In accordance with Permit Provision C.14., the 2004 URMP was resubmitted to the Water Board on February 24, 2005 as part of the *Report of Waste Discharge* (NPDES Permit Application for Re-issuance of SCVURPPP NPDES Permit).
